Projects

Yum Yard

YUM YARD is a comprehensive food delivery application designed and developed using Flutter and Dart. The application aims to provide an efficient user Friendly platform for customers to order food and for restaurant to manage orders. The project leverages modern technologies and tools to ensure a seamless robust user experience.

Coffee Shop

I developed a mobile app that streamlined coffee ordering at my shop using Flutter, Dart, Firebase, and Riverpod. The app let customers browse the menu, customize drinks, place orders, and pay directly from their phones, reducing wait times and improving convenience.

Car Hub

CarHub is a mobile application built with Dart and Flutter for buying and selling cars.The app provides a user friendly platform for individuals and dealerships to list their vehicles,browser through available cars,and make purchases.
